DETAILED ACTION

Election/Restrictions

1. This application is in condition for allowance except for the presence of claims 16 and 22, claim 16 directed to an invention non-elected without traverse, which Applicant has included currently amended, and claim 22 newly added.

The amendment to claim 16 only provides further limitation within the scope of the invention of original claim 16, and not the scope of the elected invention. It does not provide sufficient limitation to overcome the showing of distinction and burden provided by the Examiner in the original restriction requirement.

Newly submitted claim 22 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: it depends on claim 16 addressed above, and also only provides further limitation within the scope of the invention of original claim 16, and not the scope of the elected invention. It also does not provide sufficient limitation to overcome the showing of distinction and burden provided by the Examiner in the original restriction requirement.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 16 and 22 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Allowable Subject Matter

2. Claims 1-3, 5-13, 15, and 17-21 are allowed.
3. The following is a statement of reasons for the indication of allowable subject matter:

Applicant's amendment includes language that overcomes Examiner's original claim objections for claims 12, 13, and 15. Applicant's cancellation of claim 14 renders moot Examiner's original objection to claim 14.

Applicant's amendment to the independent claims of the elected invention includes language that provides sufficient limitation to the originally filed claims to overcome the prior art of record.

The Examiner is persuaded by the reasons provided in Applicant's arguments, filed 8/24/06, that the reference to Pierzchala et al. fails to teach the amended subject matter. The Examiner considers this to be the closest reference of record to Applicant's claimed invention. An updated search has not provided the Examiner with any new grounds of rejection by anticipation or any fair motivation to combine references to arrive at Applicant's claimed invention as amended.

Conclusion

4. This application is in condition for allowance except for the following formal matters:

Claims 16 and 22, withdrawn due election by original presentation, are still pending in the case and must be cancelled before allowance.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
